

## **My Plan to Improve the Office of Nevada State Controller**

**As your controller I shall immediately take charge to release the annual report pursuant to NRS 227.110 on time to the governor and legislature. I shall examine ways to modernize technology and data infrastructure to increase efficiency and reduce delays across all state agencies. I shall work with both parties to create a faster, more reliable financial reporting system to provide accurate information so lawmakers can make the best possible decisions.**

### **Three realistic goals for Nevada's next State Controller**

- 1) Modernize and strengthen the state's financial reporting systems.**
- 2) Expand transparency and audit capacity by providing fiscal oversight.**
- 3) Improve asset, revenue, expenditure and liability reporting.**

#### **Targeted Objectives**

**Fiscal Transparency** — Emphasizing clear, accessible public reporting on how Nevada spends taxpayer dollars, including modernizing financial dashboards and improving public access to audits.

**Efficient Budget Oversight** — Stressing responsible stewardship of state funds, timely financial statements and strong internal controls to prevent waste.

**Protection Against Fraud** — Highlighting commitment to detecting improper payments, strengthening audit processes and collaborating with other agencies to safeguard public money.

**Accountability to Taxpayers** — Reinforcing that the Controller's office works for the public, not political interests, by publishing clear financial summaries and performance metrics.

**Timely Vendor Payments** — Focusing on improving payment turnaround times for Nevada businesses, nonprofits and contractors who rely on predictable cash flow.

**Cognitive, Adaptive DataDriven Decision Support** — Promoting the use of analytics to help lawmakers understand longterm fiscal impacts, pension obligations and revenue trends.
